

# **NEOTIME®**

Counter-flow, self-regulating, very high efficiency (90%), high yield, super slim, double flux station. Econological® solution.

## DOUBLE FLOW UNIT

## **NEOTIME®**

#### **APPLICATION**

▲ Ventilation and energy recovery self-regulating, with

very high energy efficiency and

yield for tertiary and industrial installations.

- ▲ Yields greater than 90 % (EN308), in accordance with the RT2012 and directive ErP 2009/125/EC.
- Air filtration, temperature control.
- ▲ Monobloc, compact, super slim, plug and play and networked station (except the SEASON version).

#### **RANGE**

 $\bullet$  Available in 5 models, the <code>NEOTIME®</code> range covers flow rates from 100 to 2400 m $^3/h$ .

The **NEOTIME®** range is on offer with 5 finishes:

**SEASON**: a station for use in a temperate climate, designed for building air renewal and energy recovery, summer/ winter functioning of the bypass, adjustment of flow rates through the potentiometer.

**FIRST**: self-regulating station for use in a temperate climate and the active management of temperatures for the optimisation of energy consumption and climatic control.

**SMART**: Identical to FIRST with a compensating electric defrosting battery for external temperatures as low as -20°C.

**PREMIUM**: Identical to FIRST but equipped with either a changeover water battery (CO), or an electric battery (BE) for external temperatures of as low as -10°C.

**INFINITE**: identical finish to PREMIUM with an electric defrosting battery as standard for exterior temperatures as low as -20°C.

### **COMPOSITION**

- 10/10° double-skin panels.
- ▲ Insulation: 25 mm, A2-S1, M0 high density mineral wool (Class T3 and L1 for envelope air-tightness in accordance with EN1886).
- External face: RAL 7035 prelacquered metal with protective film.
- Internal face: galvanised steel.
- ▲ Circular branch connections with lip seals to guarantee networks remain airtight (ATEC CSTB n° 13-224-12).
- Crimped brackets as part of the structure to enable roof mounting.
- ▲ "EASY" technical compartment grouping the electrical and regulating components. Access via an opening panel straightforward maintenance. Fixed panel integrating the series proximity switch, the potentiometers (SEASON version) and the power cord grommet.
- ▲ Filter access via access hatches and via removable panels for the other interior elements
- Inclined and removable condensate tray for the evacuation of condensates where stations are assembled without an incline.
- ▲ 100% internal, motorised and self-regulating, air regulation RT2012, bypass, except SEASON (summer/ winter management via thermostat and all/ nothing opening).

### **FAN MOTORS**

▲ Direct drive, continuous current motorised fans with high yield electric commutation (EC) and integrated heat and speed variation protection. EC EC technology is an econological® solution guaranteeing low energy consumption (RT2012) for the management, control and command of the point of functioning (regulation of flow rates from 10 to 100%). Low noise levels for superior acoustic comfort.

#### **EXCHANGER**

- High efficiency, counter-flow static exchanger with aluminium plates. Air exchangers air products by KLINGENBURG which participates in the Eurovent certification programme for AAHE.
- ▲ Efficiency greater than 90% (EN 308).
- Automatic, sequenced defrosting through the proportional opening of the bypass (except SEASON, All or Nothing) then via the electric, self-regulating defrosting battery for the SMART and INFINITE versions and lastly through events.

EUROVENT

PERFORMANCE

**ECHANGEUR INTEGRE** 

and INFINITE versions and lastly through eventual modulation of the new air flow rate (except SEASON)..

### **FILTERS**

▲ As standard, the NEOTIME® station features an F7, high efficiency opacimetric filter (large filter surface) for new air and a G4 gravimetric filter for extracted air.

- Relative to the components, filters are always mounted upstream in order to ensure protection.
- Mounted on slide rails for straightforward replacement.

#### **EQUIPMENT AND FUNCTIONS**

- ▲ The FIRST SMART, PREMIUM and INFINITE versions are fitted as Standard with "EASY", regulation, networked on MODBUS, BACNET or WEB (choice of language activated on the website). It integrates an LCD, remote control function (100m to 1km with repeater). The possibility (option) of completing the "EASY" regulation with a touch activated remote control, with a user interface and screen for the main functions (temperature control, restart, fault...) as well as a maintenance interface enabling access to general parameters (command panel works from a distance of 100m.
- ▲ 100% bypass, built-in to the station, fitted with servomotors that are automatically guided by integrated regulation ensuring the FREE-COOLING and NIGHT-COOLING functions (nighttime over-ventilation with adjustable flow rate).

For the **SEASON** version the **100% Bypass** ensures summer/ winter management in All or Nothing mode via integrated thermostats.

▲ 4 choices of flow rate modulation to guarantee optimal energy consumption (RT2012, EN15232).

SEASON: Rotation speed adjustment for each fan via potentiometers mounted and wired to the facade of the regulation compartment. ECO: Rotation speed adjustment for each fan via modification of the two flow rates (PV-GV) in EASY regulation.

**LOBBY®:** air flow modulation at CONSTANT PRESSURE, adjustable For each fan (FIRST, SMART, PREMIUM and INFINITE).

**DIVA®:** Proportional modulation of the flow rate of each fan relative to the CO<sub>2</sub> level. Sensor built in to the station intake (**FIRST**, **SMART**, **PREMIUM** and **INFINITE**).

- Internal timers ensuring the programmable, two flow rate functioning chosen on the website (except SEASON).
- Weekly timer and timer for holidays and public holidays (except. SEASON).
- ▲ The pressure switch filters new with default return air on command (dry contact for SEASON).
- The pressure switch controls the air flow for each fan with default return on the command panel (dry contact for SEASON).
- ▲ A proximity switch mounted on the unit facade.
- ▲ Fire safety function (except SEASON) enabling control of the output and intake fans in 5 available modes Within regulation parameters (function activated on the website). An alarm will then be displayed on the screen "Fire alarm":

"Shutdown": Complete station shutdown.

"Active" Activation or continued operation of the station at High Speed. The fire function will take priority in the event of any other alarm.

"Auto": Continued station operation in accordance with site configuration (Shutdown/ Low Speed/ High Speed).

"Output active": Activation or continued high speed operation of the output ventilator (intake in shutdown).

"Intake active" Activation or continued high speed operation of the intake fan (output in shutdown).

For that, the NEOTIME® station features the digital input "External Shutdown" In this case, the external command takes priority over fire safety if subsequently activated by any of the 5 modes below.

## **INSTALLATION**

- ▲ Concealed behind a false ceiling.
- ▲ Direct access to the electrical cabinet and filters.

#### **CLIMATE VERSIONS**

- ▲ The NEOTIME® station offers a number of versions enabling
- guaranteed, optimal climate control (except SEASON).

  These functions are automatically managed via "EASY". regulation.

  Water or electric batteries are integrated into the station and the associated temperature sensors are mounted, wired and factory tested so that the NEOTIME® is a true "PLUG& PLAY" station:
- Temperature sensors (x4) integrated into the station: output, intake, bypass defrosting, external temp. and for **SMART** and **INFINITE** versions there is a sensor for the defrosting battery.
- Built in frost protection thermostat (THA) ensuring the protection of the cooling battery in PREMIUM/INFINITE CO versions.
- A built-in, manually reset safety thermostat (THS) ensuring the protection of the electric defrost and heating batteries for SMART, PREMIUM BE and INFINITE BE versions.

▲ The dehumidification function (can be activated on the website) consists of associating a COMBIBOX CONCEPT® module with the NEOTIME® station fitted with a heating battery (water or single cold DX) followed by a cooling battery (water or electric). In this case the

regulator will automatically manage the cooling or warming effect necessary for dehumidification while maintaining an optimal functioning temperature. During a period of where cold is requested, temperature management takes priority over of dehumidification

## MODULATION SOLUTIONS NEOTIME®

 $The \ \textbf{NEOTIME}^{@}\ station\ of flers\ networked\ EASY\ regulation\ (except\ SEASON),\ enabling\ configuration\ of\ the\ flow\ modulations\ detailed\ below:$ 

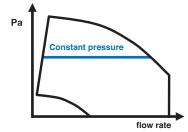

#### **NEOTIME® ECO functioning**

Choice of 1 or 2 flow rates (PV/ GV) per fan Except SEASON, 1 adjustable flow rate per potentiometer

### **NEOTIME® DIVA functioning**

PROPORTIONAL ventilation between two flow rates (PV/ GV) per fan

**NEOTIME® LOBBY® functioning** 

CONSTANT PRESSURE ventilation per fan

Front access to internal NEOTIME® elements

Remote, LCD display control (delivered as standard, except for the SEASON version) max 100m or 1000m with repeater.

ED-TOUCH touch screen. (optional, non-compatible with SEASON) with user screen and maintenance interface (until 100m)

## ACOUSTIC CHARACTERISTICS

• The Lp4m dB(A) curves correspond to the level of acoustic pressure at 4m in a hemispherical free field on a reflective plain, the "new air inlet" and "discharge intake air" sides not being connected, the "new output air" and "extraction intake air" not being connected. To achieve the overall acoustic pressure Lp dB(A), at a certain distance, add the values below to Lp4m.

Distance (m)	1,5	3	4	5	7	10
Distance weighting dB(A)	9	3	0	-2	-5	-8

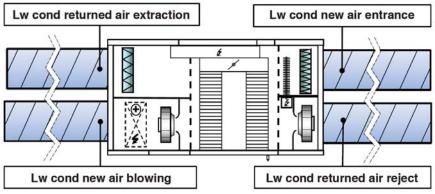

• The curves for "Lw output air cond dB(A)" correspond to the overall acoustic power emitted on the "new output air" side or "discharge intake air". To achieve the range of acoustic power Lw cond output dB(A), on the "new output air" or "discharge intake air", add the below values to the acoustic power "Lw cond output" displayed on the curves.

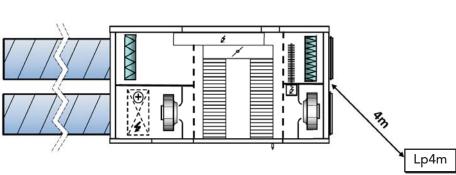

Downstream acoustic spectrum	weightin	g functio	n"Lw cor	nd blowei	dB(A)"	Indicated	on the c	urves
Frequency	63 Hz	125 Hz	250 Hz	500 Hz	1 kHz	2 kHz	4 kHz	8 kHz
Weighting NEOTIME 600 dB(A)	-37	-26	-15	-7	-5	-6	-9	-11
Weighting NEOTIME 900 dB(A)	-29	-17	-11	-7	-5	-5	-11	-18
Weighting NEOTIME 1300 dB(A)	-31	-20	-5	-8	-6	-8	-10	-16
Weighting NEOTIME 1800 dB(A)	-32	-20	-6	-8	-6	-8	-10	-13
Weighting NEOTIME 2500 dB(A)	-37	-23	-7	-8	-6	-7	-9	-13

• The curves for "Lw cond extraction dB(A)" correspond to the overall acoustic power emitted on the duct sides "extraction air intake" and new air inlet". To achieve the range of acoustic power Lw cond extraction dB(A), on the "extraction air intake" and "new air inlet" sides, add the values below to the acoustic power "Lw cond extraction" read on the curves

Upstream acoustic spectrum weig	ghting fu	ınction "l	Lw cond	extraction	n dB(A)"	Indicated	on the	curves
Frequency	63 Hz	125 Hz	250 Hz	500 Hz	1 kHz	2 kHz	4 kHz	8 kHz
Weighting NEOTIME 600 dB(A)	-32	-24	-14	-7	-5	-5	-11	-15
Weighting NEOTIME 900 dB(A)	-21	-12	-7	-5	-6	-10	-16	-22
Weighting NEOTIME 1300 dB(A)	-28	-19	-4	-8	-6	-8	-16	-23
Weighting NEOTIME 1800 dB(A)	-30	-19	-4	-8	-6	-8	-15	-20
Weighting NEOTIME 2500 dB(A)	-33	-21	-5	-8	-6	-7	-14	-20

• To achieve the acoustic range NSC4 dB(A) (noise level at 4m in a hemispherical free field, with the device placed on the ground on a reflecting plane, with station terminals connected to the intake and discharge by ducts with the same level of sound insulation), deduct 18 dB(A) from the Lp4m value.

NOTA: Tolerance = Global Values + / - 3 dB(A) Acoustic spectra +/- 5 dB(A)

NOTA: the curves are created on the basis of new air (Static Pressure) all pressure gauges connected (configuration D in accordance with regulation NF EN 13141-4)

## AIR CONTROL SOLUTION®

To meet the requirements of design departments, building inspectors'offices, architects and often installation problems, we carry out Research and Development to conceive, design and manufacture equipment and systems which combine the diversity of the requirements with technical compliance with performance and expected results.

## **ECONOLOGICAL SOLUTIONS®**

Actively present for more than 30 years in the climatic engineering domain, we are working to provide solutions and answers through technical characteristics dedicated to progress.

Through a continuous technological and regulatory watch, we envisage, propose and define ecofriendly equipment and systems.

This double approach, both economical and ecological, represents our wish to contribute to the respect for future generations.

## THE FUTURE EVERY DAY®

This vision drives us forward and is demonstrated by the commitment ("PFCT" on page 8) which characterises our quality process.

Intentionally facing the future, our enthusiasm is your confidence which supports us every day through a concrete and durable partnership.

Enriched by our past experiences, we work every day with this dynamic vision which drives our developments and our partnerships.
