QV75-06125TE-1

Quiet-Vent 6pt 75mm Top Entry Distribution Box - 125mm Spigot

Technical Specification

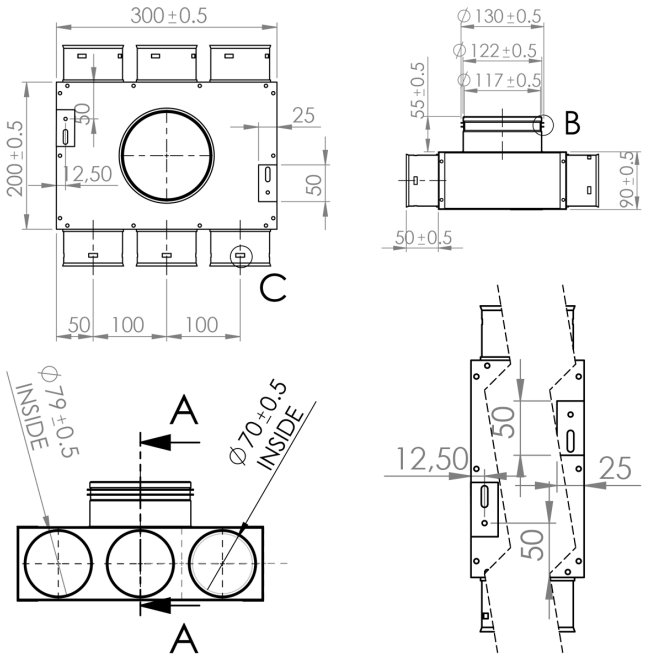

Manufacturer	Quiet-Vent
Part Number	QV75-06125TE-1
Type	Manifold / Distribution Box
Spigot Size	125mm
Connection	6 x 75mm
Material	Galvanised Steel
Application	Supply / Extract

Product Overview

The Quiet-Vent 6-Point Top Entry Distribution Box with 125mm Spigot is designed to provide efficient airflow distribution within residential MVHR systems. Featuring six 75mm radial duct connections and a 125mm main spigot, it provides a practical solution for connecting multiple duct runs while maintaining an organised ventilation system.

Manufactured from durable metal, the distribution box is suitable for installation within ceiling or floor voids, offering flexibility for different ductwork layouts. Its compact 300mm x 200mm x 90mm design allows for convenient integration into ventilation systems, while the two supplied blanking caps can be used to seal unused connections. Compatible with Quiet-Vent radial ducting, it provides a reliable solution for residential ventilation installations.
