

# Quiet-Vent 75mm Plenum

## Part Number

**QV75-PLEN**

## Specifications

**Material:** High-quality plastic

**Ducting Size:** 75mm diameter

**Spigot Size:** 150mm diameter

**Dimensions:** As Shown

**Installation:** Ceiling or wall-mounted

**Airflow Optimization:** Smooth internal surface for reduced resistance

## Application

- Mechanical Ventilation with Heat Recovery (MVHR) systems
- Residential and commercial ventilation applications
- Ceiling and wall-mounted ducting installations
- High-performance air distribution setups

## Product Overview

The Quiet-Vent 75mm Plenum is a premium air distribution component designed to optimize airflow efficiency in mechanical ventilation systems, including MVHR (Mechanical Ventilation with Heat Recovery) installations. Constructed from high-quality, durable plastic, this plenum ensures long-term performance and reliability while maintaining a low-profile, space-saving design. Its smooth internal surface minimizes air resistance, contributing to an energy-efficient ventilation solution for both residential and commercial applications.
