## QV90PCP

Quiet-Vent 90mm radial pipe clips (Pack of 10)

### Technical Specification

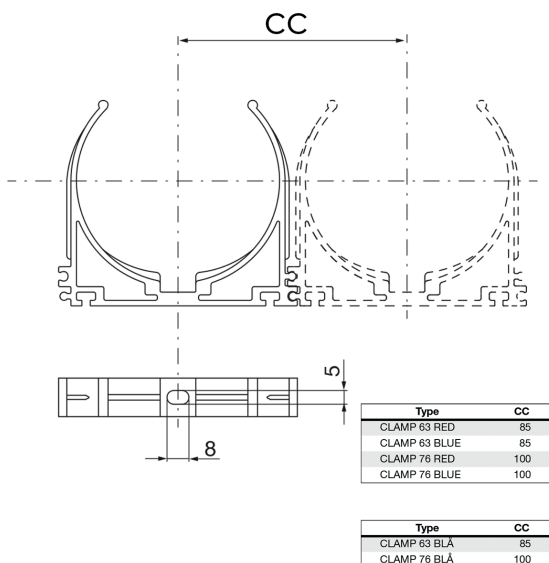

Manufacturer	Quiet-Vent
Part Number	QV90PCP
Type	Radial Pipe Clips
Connection	90mm
Application	Ducting

### Product Overview

The Quiet-Vent 90mm Radial Pipe Clip is designed to securely fix 90mm round radial ducting in place within MVHR and mechanical ventilation systems. Supplied as a pack of 10, these clips help support neat and reliable duct installation while keeping ducting positioned away from building fabric, helping to reduce noise transmission and vibration through the structure.

The interconnectable clip design provides added flexibility during installation, making it easier to secure duct runs across floors, ceilings, and service voids. SAP Appendix Q approved, the clips are suitable for use in ventilation layouts where acoustic performance and correct duct support are important. For best results, clips should be installed at recommended spacings of 0.75 to 1 metre along the duct run.
